## Executive Summary

Vision, Goals & Strategic Context

# EXECUTIVE SUMMARY

## OUR VISION

Wingstop is embarking on a global Guest Experience transformation to become a data-driven, proactive organization that anticipates guest needs, resolves issues with speed and consistency, and empowers Brand Partners with real-time insights.

Today, guest feedback is fragmented across Sprout, Yext, SMG, DoorDash, Uber Eats, and MCI — making unified, actionable insights nearly impossible. We lack a consistent support experience and do not yet leverage AI to scale personalized help.

This RFP seeks vendor partners to build the next generation of GX capabilities: a unified global survey insights platform and an AI-powered chatbot in the Wingstop app.

## STRATEGIC GOALS

- One source of truth for global guest feedback with refined set of survey questions
- Multilingual survey + integrated sentiment analysis
- AI chatbot for in-app guest support & ordering
- Role-based dashboards: BPs, GMs, GX, Call Center
- Integrations: Snowflake, PowerBI, MyWingstop (US Only), DoorDash, UberEats, QSC, Arguilea (INTL only), KDS (US only), POS
- Reduce call center volume through AI-enabled, guest self-service
- Build consistent, policy-based refund & resolution workflows between Wingstop and Brand Partners
- Sustainable global rollout with Change Management

# 02

## **Current State & Pain Points**

Challenges Driving This Initiative

# CURRENT STATE | PAIN POINTS

## Fragmented Feedback Data

Guest feedback lives in silos: Sprout (X, Facebook, Instagram, Tik-Tok, Reddit), Yext (Google Reviews, Apple Reviews, Yelp), SMG, DoorDash, Uber Eats, and MCI. No single guest view. Manual reporting takes weeks.

## SMG Survey Limitations

Current survey is long, has Gmail deliverability issues, a survey limit of 15-min per-store, no POS integration, and doesn't reach 3P guests. Lack of POS integration leads to guests often entering erroneous data into survey – discrediting responses.

## Wrong KPIs Measured

Ops Scorecard rewards Speed over Quality/Accuracy. NPS and Ease of Ordering are not tracked — misaligning incentives. Hospitality has been recently added, to measure the success of Wingstop's HYPE program designed to improve hospitality.

## Inconsistent Guest Support

1P guests contact the store directly (no ticket is logged). 3P guests go to DoorDash/Uber Eats. No unified support workflow, tracking, or SLA.

## Broken Refund Process

Federated refund model depends on Brand Partners to execute. BPs delay or decline refunds, leaving guests with no escalation path.

## No AI Self-Service

Competitors (Chipotle, Popeyes, Starbucks) deploy AI chatbots. Wingstop guests have no in-app help — driving avoidable call center volume.

# CURRENT STATE | TECHNOLOGY LANDSCAPE

## TECHNOLOGY

### KEEP & INTEGRATE

QSC - Steritech (US)

QSC - Arguilea (INTL)

DoorDash

Uber Eats

POS/ KDS (US)

CRM/Loyalty - Salesforce

### REDUCE

MCI Call Center

Manual Reporting

Yext

*Reduce usage on Google, Apple and Yelp Reviews, but keep for store listing purposes*

### RETIRE / REPLACE

SMG (Survey)

Sprout Social

## NEW PLATFORM SOUGHT

Global Survey Insights Platform · AI Chatbot in Wingstop App · Unified Guest Feedback Data · Role-Based Dashboards  
Integrations considering best practices and Wingstop's MuleSoft integration layer

# 03

## Future State Vision

Target Capabilities & Desired Outcomes

# FUTURE STATE | TWO CORE WORKSTREAMS

## WORKSTREAM 1

### Global Survey Insights Platform

- Replace SMG with a modern, unified feedback platform
- Dynamic simplified surveys — 1P, 3P, in-restaurant
- Multilingual + accurate cross-language sentiment
- Role-based dashboards: BP Leadership (visibility across multiple stores), GMs, GX, Call Center
- Public sentiment: X, Facebook, Instagram, Tik-Tok, Reddit, Google Reviews, Apple Reviews, Reddit, DoorDash, UberEats
- Integrate survey results with Customer & Loyalty data to drive stronger insights
- Revamp KPIs to accurately measure Speed, Hospitality, Accuracy, Quality, NPS + Ease of Ordering

## WORKSTREAM 2

### In-App AI Chatbot

- AI chatbot in Wingstop app — branded as 'Lil Ranchie'
- Helps guests with FAQs, store information, loyalty information, account support, issue resolution, and ordering support
- Seamless escalation to live agent (call center) with full context
- Immediate resolution using defined refund matrix, including refunds, points and/or credit
- Future-state: in-app ordering support via chatbot
- Chatbot feedback flows into survey insights platform
- Projected reduction in MCI call center inbound volume

# FUTURE STATE | ROLE-BASED DASHBOARDS

## Brand Partners

- ❑ Portfolio-level NPS, CSAT & sentiment rollup across all owned locations
- ❑ Social sentiment trends: Facebook, X, Instagram, and Reddit
- ❑ Google Reviews, DoorDash & UberEats ratings and review trends
- ❑ QSC audit trends by store — flag underperformers
- ❑ Survey result trends with WoW / MoM / YoY comparisons
- ❑ Top issues by category — aggregated across portfolio
- ❑ Drill-down: click any KPI to explore store-level detail

## Guest Experience Team

- ❑ Global, regional & BP portfolio views — drill to store level
- ❑ Cross-channel issue trending: Social, Google/Apple reviews, DSPs
- ❑ Real-time social listening — respond to FB, X, IG, Google & Apple reviews
- ❑ Social care workflow: assign, escalate & close social interactions
- ❑ Chatbot metrics: deflection rate, escalation rate, CSAT post-chat
- ❑ Call center metrics: volume, SLA adherence, resolution time
- ❑ Issue resolution trends — top drivers, category breakdown
- ❑ Industry benchmarking vs. competitors for key CX metrics

## General Managers

- ❑ Week-over-week store scorecard: NPS, CSAT, complaint volume
- ❑ Top guest complaints & compliments — categorized and ranked
- ❑ Top operational issues this week (food quality, speed, accuracy)
- ❑ Open call center tickets requiring GM action or response
- ❑ Shift-level performance trends — spot problem day-parts fast
- ❑ Social & review alerts: new reviews needing attention
- ❑ Recognition & milestone alerts — celebrate team wins
- ❑ Resolution status of escalated guest issues

## Call Center (MCI)

- ❑ Unified intake queue: surveys, chatbot handoffs & phone calls
- ❑ Full guest context: history, loyalty tier, prior interactions
- ❑ Chatbot handoff transcript & conversation context
- ❑ Refund authorization queue with approval workflow
- ❑ Resolution method tracking: what was offered & how we responded
- ❑ Closed-loop visibility: GX team can see every resolution & response
- ❑ Ticket SLA tracking — prioritize by urgency & tier
- ❑ Daily & weekly KPI summaries: volume, handle time, CSAT

# 04

## Scope of Work

Detailed Requirements for Vendors

# SCOPE | GLOBAL SURVEY INSIGHTS PLATFORM

## Survey Capabilities

- ✓ Dynamic survey logic
- ✓ Mobile-optimized
- ✓ Dynamic QR code – integrated with POS (receipts, bag stickers, in-restaurant)
- ✓ Email, SMS and WhatsApp delivery
- ✓ IP-based deduplication rules to prevent gamification
- ✓ Loyalty points incentive for survey completion

## Multilingual & Sentiment

- ✓ International language support with text analysis in native language
- ✓ Native-language survey rendering (not translation overlays)
- ✓ Accurate sentiment analysis in ALL supported languages
- ✓ Automatic language detection from guest profile or browser

## Data Ingestion & Integrations

- ✓ DoorDash ratings & reviews via API
- ✓ Uber Eats ratings & reviews via API
- ✓ Google My Business reviews (automated pull)
- ✓ Apple Maps / App Store reviews
- ✓ Social Sentiment Monitoring: X, Facebook, Instagram, Reddit
- ✓ MCI call center ticket data
- ✓ AI chatbot session details and feedback for monitoring & support escalation

## Data Output & Governance

- ✓ Real-time sync to Snowflake BI data warehouse
- ✓ Cleansed, standardized guest record with CRM linkage
- ✓ Loyalty ID linkage to all feedback records
- ✓ Open API / webhook framework for future integrations

# SCOPE | IN-APP AI CHATBOT

## FUNCTIONAL REQUIREMENTS

### Order Support

Track orders, report issues, upload photos, select issue type, support issue resolution given defined matrix

### Loyalty & Rewards

Check points, redemption, tier status questions

### Account Help

Login, password, profile, payment method questions

### Wingstop Info

Menu, locations, hours, allergens, promotions

### Issue Resolution

Refund initiation per policy matrix, credit, points recovery

### Live Agent Handoff

Seamless escalation with full conversation context

### Future: Ordering

In-app order placement via conversational interface

## TECHNICAL & NON-FUNCTIONAL

- Native iOS & Android SDK integration with Wingstop app
- Real-time integration with order management & CRM
- Loyalty platform integration (read/write points & tier data)
- Policy engine for automated refund/credit decisioning
- Secure PII handling — CCPA, GDPR, PDPA compliant
- 99.9% uptime SLA with defined incident response
- Multilingual NLU — English, Spanish, French minimum
- Chatbot session data exported to survey insights platform
- Human-in-the-loop escalation queue & agent console
- Full conversation audit log & analytics dashboard

# CHANGE MANAGEMENT & GLOBAL ROLLOUT

*Wingstop operates across 3,000+ locations globally. A rigorous change management approach is required for sustainable adoption.*

## Stakeholder Engagement

Structured engagement for GX, Ops, Tech, Legal & Finance. Clear RACI and communication cadence throughout the program.

## Brand Partner Enablement

Training playbooks and communications designed for BPs across all markets, including GIM-level dashboard adoption training.

## Phased Global Rollout

Pilot US first, then international. Defined go/no-go criteria with success metrics before broad deployment.

## Project Management

Dedicated PM, weekly status reporting, risk register, milestone tracking. Food service or retail deployment experience required.

## Refund Policy Rollout

Support operationalizing updated refund and resolution policies with Brand Partners. Platform enforces policy guardrails.

## Adoption Measurement

Defined adoption KPIs. Post-launch hypercare with optimization checkpoints at 30 / 60 / 90 days.

# 05

## Integration & Technical Requirements

Systems, Data Architecture & Connectivity

# GX TRANSFORMATION ARCHITECTURE

## HOW GUESTS INTERACT WITH WINGSTOP

### 1P App & Web | Built-In Chatbot (AWS or Salesforce)

- Ordering support
- Issue resolution
- Loyalty & rewards
- FAQs & menu info
- 1P Delivery order support

### 1P Delivery & DSP Support

- In-app delivery issue handling
- DoorDash CSS integration
- Uber Eats / GrubHub connect
- Real-time order status
- Agent assist for DSP escalations

### Social & Review Channels

- Facebook · X · Instagram · Reddit
- Google Reviews & Apple Maps
- GX team responds directly
- Social care & reputation mgmt
- Cross-channel issue trending

## WINGSTOP, BP & CALL CENTER DASHBOARDS

### BRAND PARTNER LEADERSHIP

- Portfolio SHAQ, NPS/CSAT rollup
- Social sentiment trends
- Google + DSP trends & ratings
- QSC audit trends
- Store drill-down & benchmarks

### GENERAL MANAGERS

- Week-over-week scorecard
- Top complaints & issues
- Open CC tickets to act on
- Shift-level performance
- Review & social alerts

### GX & SOCIAL CARE TEAM

- Global / regional / store views
- Cross-channel trending
- Social care & responses
- Chatbot & call center metrics
- Industry benchmarking

### CALL CENTER

- Unified intake queue
- Full guest context & history
- Chatbot handoff transcripts
- Resolution method logging
- Closed-loop visibility to GX

## ENABLING FOUNDATIONS

### BP ↔ Wingstop Refund Policy

Centralized rules · BP accountability · consistent store execution

### Resourcing

Right-sized GX, CC & analytics teams · vendor/partner scoping

### KPI Definition & Scorecards

Right metrics · BP accountability scorecards · reporting cadence

### Change Management

Stakeholder comms · role-specific training · adoption tracking

# DATA ARCHITECTURE & TECHNICAL STANDARDS

## Data Centralization

- ✓ Single cleansed guest record linking survey, chatbot, social & 3P data
- ✓ All guest records linkable via loyalty ID and/or email
- ✓ Data exportable to Snowflake via real-time or scheduled pipeline
- ✓ Full data dictionary and schema documentation required

## Security & Compliance

- ✓ SOC 2 Type II certified (required)
- ✓ GDPR / CCPA / PDPA compliant data handling
- ✓ Data residency options for EU, UK, SEA markets
- ✓ Role-based access controls with SSO (Okta preferred)

## International / Multilingual

- ✓ Native support: English, Spanish, French, Arabic, Malay/Bahasa + TBD
- ✓ Sentiment accurate in all languages (not translated-to-English)
- ✓ RTL language support for Arabic rendering
- ✓ Localized date/time, currency & number formats per market

## Performance & Reliability

- ✓ 99.9% platform uptime SLA minimum
- ✓ Defined RTO/RPO for disaster recovery
- ✓ API response < 500ms at P95 for real-time integrations
- ✓ Scalable to 50M+ annual guest interactions globally
